

All-In-One Datalogger

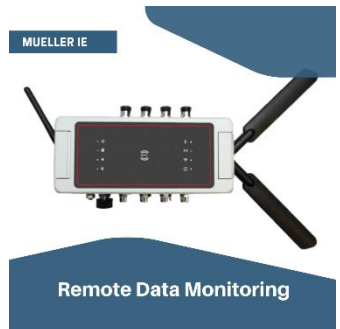

Remote Monitoring of Plants and Gen Sets

MÜLLER
INDUSTRIE - ELEKTRONIK GMBH

The DL-ToolBox 4.0 from Müller IE is the suitable tool for remote monitoring of gensets and plants.

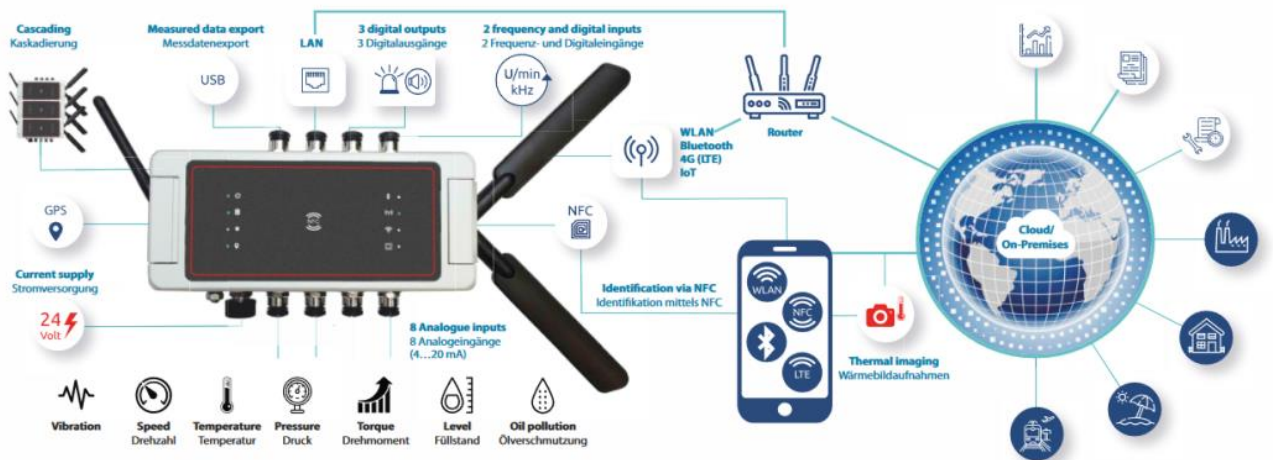

Using a web app and software, machine data is digitised and monitored, thereby reducing operating and maintenance costs.

Remote diagnosis is possible using intuitive evaluation software on smartphone, PC and data cloud.

Technical Features

- Sensor input: 8 x analogue 4...20 mA, 2 x digital, configurable as counter
- Sensor signal: temperature / vibration / speed / level / differential pressure / torque / humidity / force / position / operating hours and switching times / all physical variables
- Compatible with all 4-20 mA industrial sensors
- Output: 3 x digital (normally closed / open)
- Supply: 24 VDC
- Temperature: -30 to +60 °C
- Protection class: IP 66/67
- Interfaces: USB / LAN
- Options: 2G/4G mobile radio / Bluetooth/WLAN / GPS positioning / NFC
- Web App and evaluation software for remote monitoring and evaluation
